Construction Update Q2 2022:

[Mason & Main @ Merrylands](#) Video

Since the Q1 2022 update, progress has been made on-site edging closer to delivering the Mason & Main precinct – a new local destination with exclusive amenities and the very best of Merrylands conveniently at your doorstep.

Construction commences on Stage Two Buildings D & E

We're pleased to announce that construction has commenced on Buildings D and E. A piling rig is established on-site with excavation to follow. As part of the works, the Mason & Main Display Gallery will be relocated in couple of months.

Stage One Buildings A, B, and C continue to make progress

Despite the NSW Construction industry facing ongoing impacts of COVID-19, supply chain issues and unprecedented wet weather through March, Mason & Main Buildings A, B and C have continued to make progress on site. Most excitingly, the buildings are now making their ascent out of the ground and are clearly visible at street level.

Bulk excavation of Building C is underway and making strong progress with Sydney's improved weather. There's also plenty of activity happening along Merrylands Road with trucks clearing the soil from the site each day.
